She has a deep understanding of how people think, work and react across the generations from baby boomers, generation x, generation y and the younger generation z. Her passion is educating people on how your brain works as well as the different multigenerational views and she has an innate ability to share her knowledge and demonstrate how these can be applied to promote greater understanding, resulting in greater performance, communication and business growth.

Holding key management and leadership roles within the Telecommunications industry for more than 20 years, Evelyn was regarded as the 'go to' person on a range of corporate areas including employee coaching and mentoring, union delegate assistance, employee rights, nationwide policies, procedures and rollout of systems, demonstrating the high regard held for her.

Based in Sydney, NSW.

*"I originally approached Evelyn for business coaching as didn't have a business plan and felt I was lacking clarity and direction in where my business was heading. Evelyn helped break down all the necessities required when running a business and made business planning clear and straight forward, prompting me to address different areas of my business I hadn't thought of. I would recommend Evelyn to any small, medium or large business owner who needs some direction in their business, or just someone to talk to and bounce ideas off on a regular basis. Thank you Evelyn for all your help!"*

### Why Coaching?

"I've always loved getting to know all kinds of people and what makes them tick. Coaching has allowed me not only to get to know many different kinds of people but also to help them to become the best they can be by understanding themselves better. There is no greater reward than seeing someone else get those Ah-ha moments & change before your eyes and to share in their successes"
