Testimonial

"I used Kendra's services in the sphere of personal and business coaching. Looking to increase and expand our healthcare business, we knew that this would require a change of thinking and a review of our limiting beliefs, as well as a re-appraisal of our values and goals. Kendra's easy and amiable communication style enabled us to challenge our preconceptions in a clear and enlightening way, and she gave us many valuable and useful cutting edge psychological resources to aid us in our objectives.

By the end of her coaching program our monthly gross income increased by an average of 25% compared to previous months. I have no doubt that this was directly attributable to role she played as our coach. I would highly recommend Kendra to anyone struggling to get out of a rut, or for those wanting to break out of their self-imposed limitations and progress to a new level."

"It is truly a privilege to be a coach. I believe that people do have the answers within, all they need is a little help getting out of their own way and someone to witness the journey."
